Tokyo-London Green Finance Seminar 2021 and Call for Participants

Based on the Memorandum of Understanding between the Tokyo Metropolitan Government (TMG) and the City of London Corporation concerning the exchange and cooperation, which was concluded in December 2017 (*), the Green Finance Seminar is to be organized jointly by TMG and the British Embassy in Japan.

For the fourth time this year, we are planning to include in the program a keynote speech by the Lord Mayor of the City of London, a talk with experts from Japan and the UK, and a roundtable discussion with the financial professionals.

In “Global Financial City: Tokyo’ Vision 2.0 --- Realizing a Sustainable Recovery to Become a Global Financial City Leading the World ---” announced on November 1, 2021, TMG places vitalization of green finance as a key pillar.

We will introduce the latest trends and work being done by both cities on Green Finance, which has been rapidly expanding in recent years. We welcome you to watch the program.

*The Memorandum of Understanding between the Tokyo Metropolitan Government and the City of London, the financial centre of London, and covering collaboration on financial events, financial training programs and green finance and the like, as a part of the effort to promote the “Global Financial City: Tokyo” Vision.
